canasa

COMPANY PROFILE · 2026

Industrial recycling, refined for the Kingdom

Scrap metal, cables, compressors and e-waste, bought by weight and grade at a licensed yard in Dammam's Second Industrial City. Bins, roll-offs, environmental services, projects and manpower across the Eastern Province.

WHY CANASA EXISTS

Scrap leaves Saudi factories, sites and homes every day. Too much of it is weighed on someone's word, priced on the spot and never traced again. canasa was set up to be the other option.

A licensed yard in Dammam's Second Industrial City, with Canadian and Saudi roots. Every load crosses a certified weighbridge, and every price is agreed in writing before the truck moves. The same terms apply to one bin from a workshop and to an industrial contract.

AT A GLANCE

16
MATERIALS
Bought by weight and grade, copper to e-waste.

6
CITIES SERVED
Dammam, Khobar, Dhahran, Jubail, Abqaiq and Al Hofuf.

7
DAYS TO PAYMENT
Cash at the gate, or bank transfer within seven days.

7
LANGUAGES AT THE GATE
English, Arabic, Urdu, Bengali, Hindi, Tagalog, Malayalam.

WHAT WE DO

Recycling at the core, with three services alongside

Recycling is the core of the business. Environmental services, projects and manpower run from the same yard, under the same written terms, with one point of contact.

01

Recycling

Scrap metal, cables, compressors and e-waste, bought by weight and grade at the gate or collected in bins across the Eastern Province.

YOU GET A written price, a weigh ticket and payment within seven days.

02

Environmental services

Bins and segregation stations sized to the building, emptied on fixed days, with recovery through the canasa yard.

YOU GET One desk, one invoice and one monthly report for every stream.

03

Projects

Strip-outs, decommissioning and demolition recovery, where the metal recovered pays part of the bill.

YOU GET One written package and a close-out statement matched to the tickets.

04

Manpower

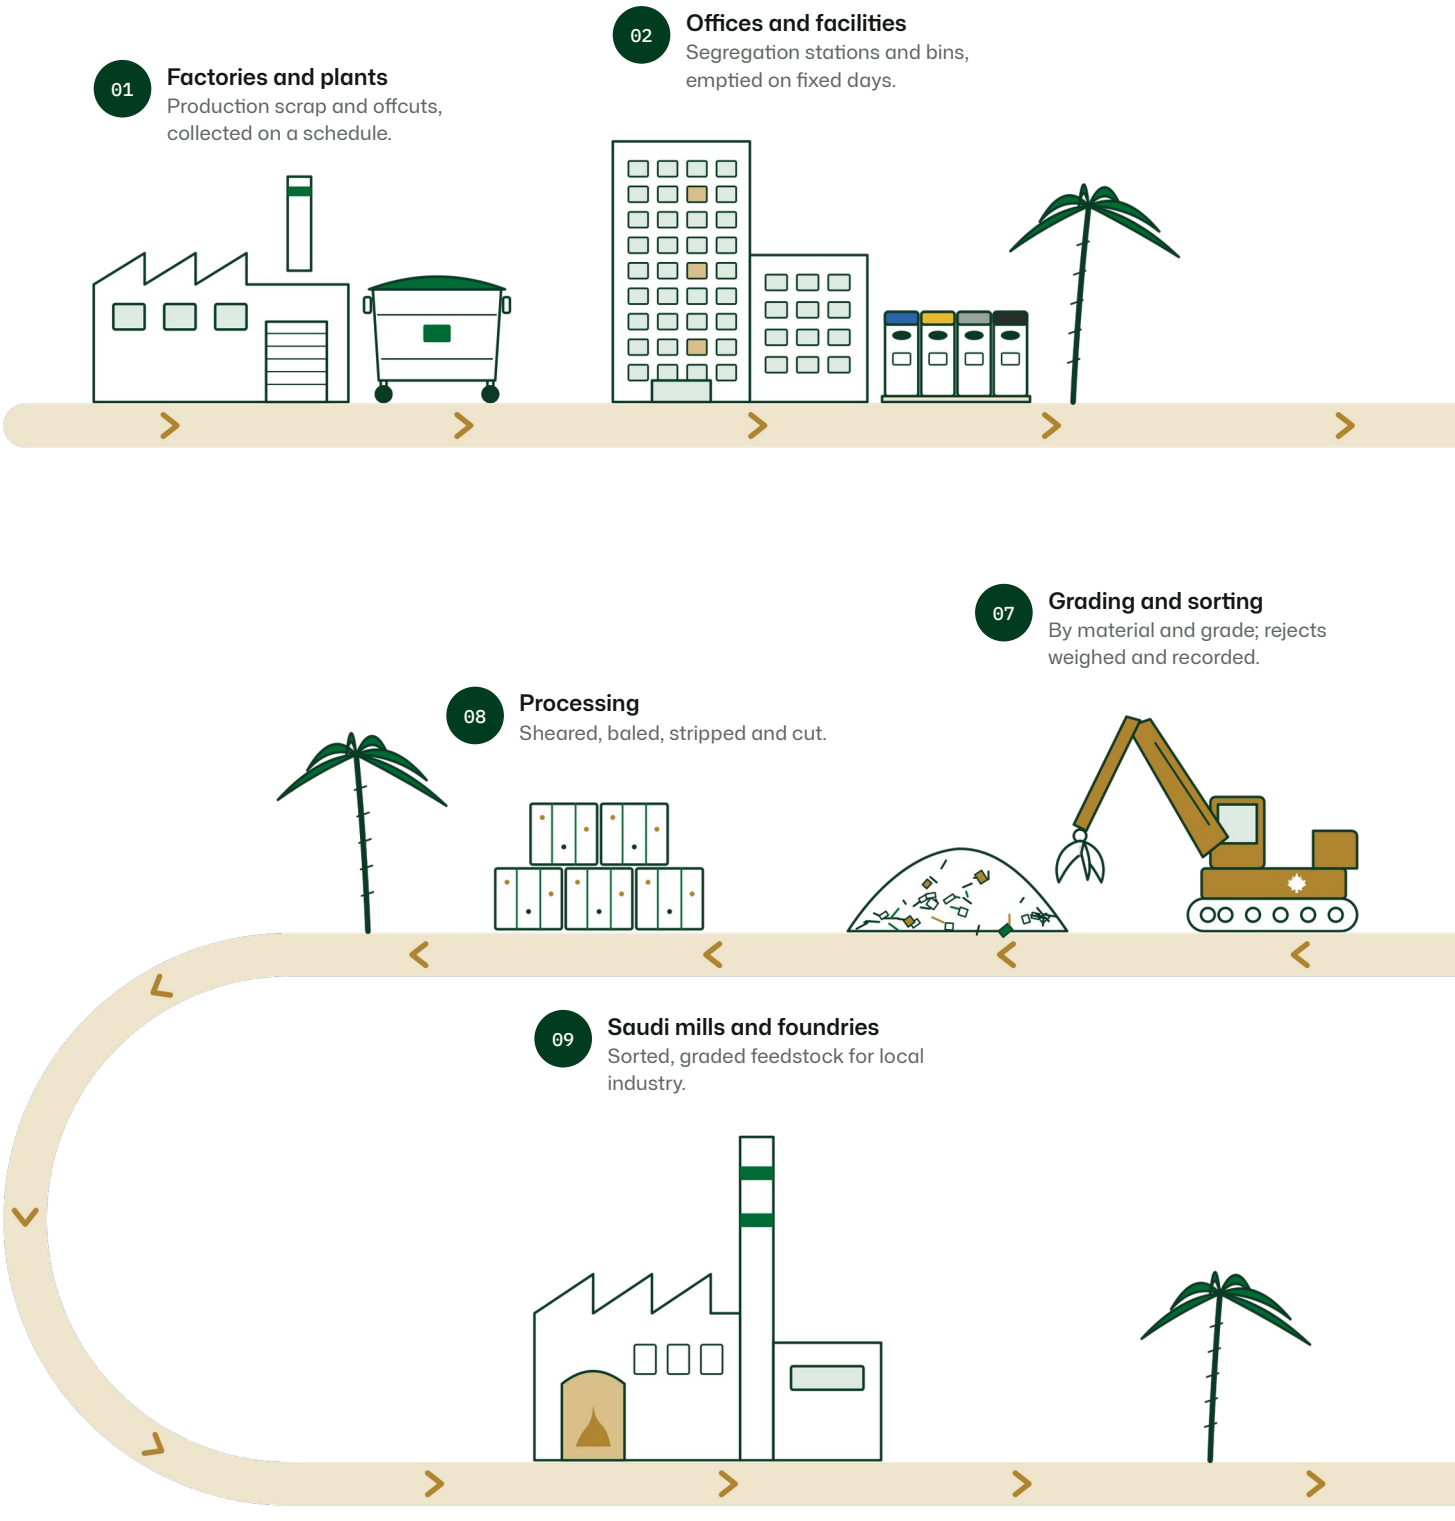

Drivers, operators, trades and site crews, screened and documented before day one.

YOU GET A written supply plan, worker files and a briefing in the crew's language.

THE CANASA ROUTE

How material moves through canasa

From the bin on a client's site to a Saudi mill or an export buyer. Each step leaves a document, so a load can be traced from the first lift to the monthly report.

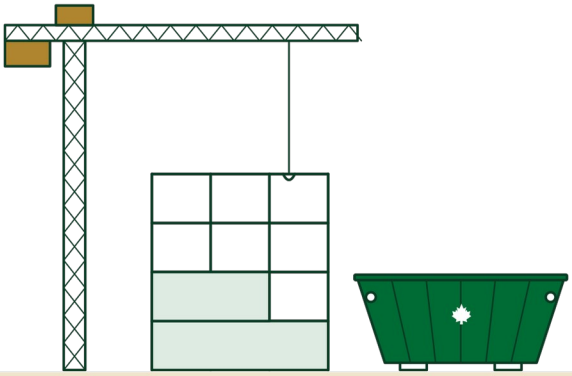

LOADS LEAVING FOR BUYERS

Containers loaded with alloy wheels, baled cans and engine blocks.

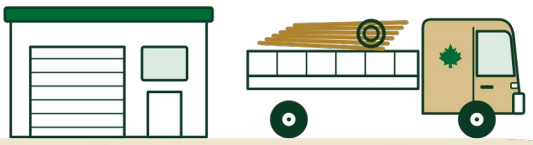

03 Projects and sites
Skips and roll-offs, swapped when full.

04 Workshops and households
Single loads at the gate, no appointment.

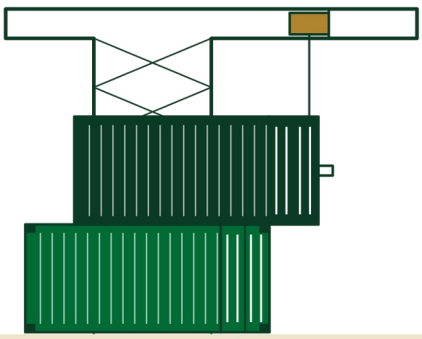

06 Weighbridge
A certified weight, photographed, on a ticket you keep.

05 Collection
Bins and roll-offs in Dammam, Khobar, Dhahran, Jubail, Abqaiq and Al Hofuf.

10 Export buyers
Containers loaded for overseas buyers.

11 Monthly report
Tonnage, diversion and CO_2e, backed by weigh tickets.

WHAT WE BUY

Sixteen materials, bought by weight and grade

Send photos on WhatsApp or bring the load to the gate. A grader gives the price in writing, per load, before anything is weighed.

HIGH VALUE

Copper #1

نحاس ١

Bare bright, the top grade

Copper #2

نحاس ٢

Tarnished or soldered

Insulated wire

أسلاك معزولة

Priced on recovery ratio

Brass

نحاس أصفر

Solids, fittings, valves

MID VALUE

Aluminium 6063

ألمنيوم 6063

Extrusion, frames, profiles

BY ARRANGEMENT

Industrial plastic

بلاستيك صناعي

PET, HDPE, PP

Wood pallets

طبليات خشب

Intact timber pallets

Prices are given in writing, per load, and are not printed in this brochure. Photographs are typical of each grade.

SELLING TO THE YARD

Selling to the yard, in four steps

01 Photos

Send photos of the load on WhatsApp. A grader replies with a written price.

02 Delivery or collection

Drive in without an appointment, or book a bin or roll-off near your site.

03 Weigh-in

The load crosses the certified weighbridge while you watch, and you keep the ticket.

04 Payment

Cash at the gate, or bank transfer within seven days, at the price agreed in writing.

Specimen. Every load leaves with a ticket like this.

EVERY LOAD LEAVES WITH THREE DOCUMENTS

01

The written quote

Material, grade, price per kilo and how long the price holds, sent to your phone.

02

The weigh ticket

A certified weight with a photograph, the date and both signatures, in your hand before the truck leaves the scale.

03

The receipt

The amount, payment method and date, and the number of the ticket it settles.

GATE HOURS	WHATSAPP THE YARD	PRICES	AT THE GATE

BINS AND CONTAINERS

Bins for offices, plants and stores

We supply indoor segregation stations, wheelie bins, wheeled containers, skips and roll-offs. Each site is sized after a walk-round, and the sizes are reviewed against measured fill levels.

DRAWN TO ONE SCALE

Segregation station

3–4 × 60 L

WHERE Offices, corridors and print rooms.

Colour-coded, with bilingual signs.

Wheelie bin

120 / 240 L

WHERE Pantries, canteens, kitchens and small stores.

Lidded. Food bins are sealed.

Wheeled container

660 / 1,100 L

WHERE Bin stores and loading bays.

Cardboard, plastics, cans and general waste.

Secure e-waste cage

Lockable

WHERE IT rooms and stores.

Data-bearing devices logged by serial number and kept locked until destroyed.

BIN COLOURS ON CLIENT SITES

Blue Paper and card	**Yellow** Plastics	**Green** Glass	**Grey** Metals and cans
Red Electronic waste	**Orange** Batteries	**Brown** Food waste	**Black** General waste

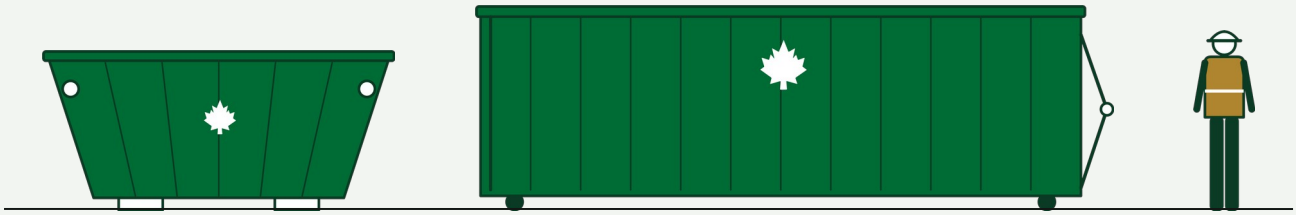

Colours follow EN 16403. Where a client has its own colour standard, that standard is used.

BINS AND CONTAINERS

Skips and roll-offs for yards and projects

For workshops, yards, clear-outs and project sites. Every exchange is weighed at the yard.

DRAWN TO ONE SCALE

Skip

6–8 m³

WHERE Workshops and yards.

Metal scrap, pallets and bulky waste.

Roll-off

20 / 30 yd³

WHERE High-volume sites, clear-outs and projects.

About 15 / 23 m³.

Goes in

- Metal scrap and offcuts
- Cables and wire
- Motors and compressors
- Pallets and crates
- Cardboard and boxes
- Furniture and bulky items

Keep out

- Gas cylinders and aerosols
- Fuel, oil and paint
- Asbestos
- Batteries
- Medical waste
- Food waste

Not sure? Send a photo on WhatsApp before it goes in. Batteries and food waste have their own bins. Anything that needs a specialist permit is collected separately, through licensed partners named in writing.

HOW A CONTAINER SERVICE RUNS

01 Site walk
We walk every stream with your site lead: access, hours, permits.

02 Containers placed
Sized to the building and the streams. Crew briefed on your site rules.

03 Lifts
Bins on fixed days. Skips and roll-offs swapped when full.

04 Weighed at the yard
Every lift crosses the certified weighbridge and is photographed.

05 Monthly report
Tonnage by stream, diversion share and destinations.

WHERE WE PLACE THEM

Dammam, Khobar, Dhahran, Jubail, Abqaiq and Al Hofuf.
Riyadh by agreement.

REQUEST A BIN

WhatsApp +966 56 978 9151

ENVIRONMENTAL SERVICES

Waste collection and recovery for sites and facilities

Collection, recovery and reporting for offices, plants and project sites across the Eastern Province. What can be recycled goes through our own yard and is credited back to you. Streams that need a specialist permit go to partners we name in writing.

Facility waste programmes

Bins and segregation stations sized to the building, emptied on fixed days.

Industrial and site waste

Skips and roll-offs on site, cleared around your production run.

Recovery and revenue share

Recoverable material weighed and graded openly at the yard.

E-waste

Itemised intake for servers, UPS units, drives and boards.

Regulated streams

Routed to permit holders we name in the contract.

Sustainability reporting

Tonnage by stream, diversion share and destinations, monthly and yearly.

HOW AN ASSESSMENT WORKS

Free, and the scope comes back in writing.

01

Tell us the site

The buildings or site, roughly what is there now, and who collects it today.

02

We walk it

About an hour on site, at no cost.

03

Scope in writing

Scope, price, partners and permits on paper, with monthly reporting backed by weigh tickets.

WHAT YOU CAN HOLD US TO

One desk

Every stream on the site runs through a single desk, a single invoice and a single monthly report.

Partners named in writing

Hazardous, medical, liquid and municipal streams go to partners registered with the National Center for Waste Management, named in the proposal and the contract.

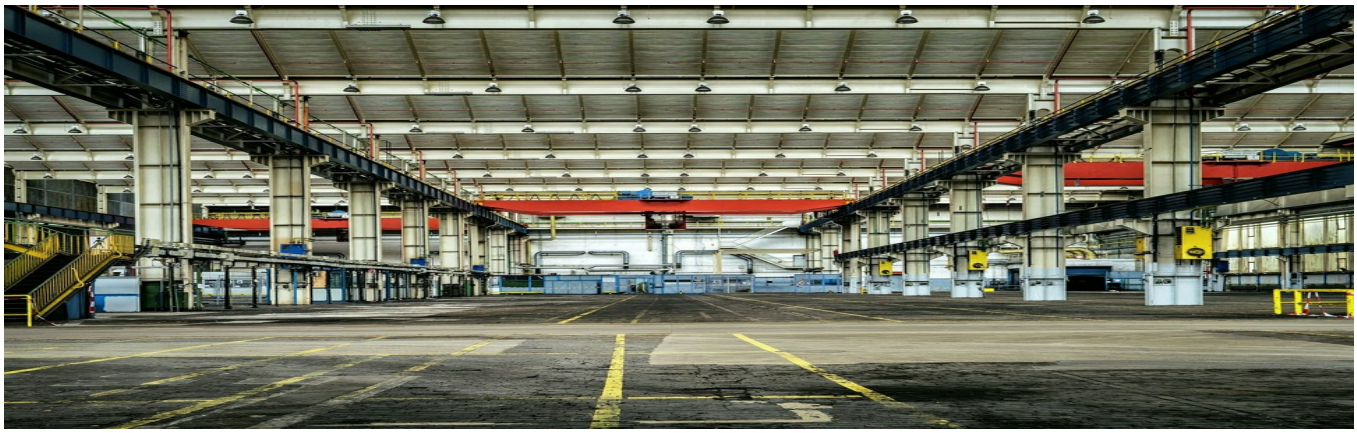

Recovery credited

Metal, cardboard and plastic are weighed and graded at the yard, and the value is credited against your invoice.

PROJECTS

Strip-outs, decommissioning and demolition recovery

Site clearances where the metal we recover pays part of your bill. Scoped on site, priced as one written package and documented to the tonne.

HOW A PROJECT RUNS

01

Walk the site

Our estimator walks the site with you and notes access, hours and permits.

02

One written package

Scope, schedule, price and the recovery credit that reduces it.

03

Cut, clear and load out

Every outbound truck is weighed and photographed.

04

Close-out

Bill of materials, weigh tickets and the final settlement.

HOW THE NUMBER WORKS

The recovered metal is credited on the quote before the first truck rolls.

Project cost Cutting, clearing, haulage

Recovered value Metal weighed and credited

Your bill Cost less the recovered value

Illustrative proportions.

WHAT WE TAKE ON

Strip-outs and clearances
Workshops and warehouses

Decommissioning
Plant areas

Demolition recovery
Full structures

Site clearance
Yards and sites

WHAT YOU HOLD AT THE END

The written package, a weigh ticket for every truck and a close-out statement matched to the tickets.

MANPOWER

Drivers, operators and site crews for the Eastern Province

Screened, papered and briefed before day one, and supplied under the same written terms as everything else canasa does.

WHO YOU CAN ASK FOR

Drivers

HGV and medium-duty drivers

Equipment operators

Excavators, loaders, yard plant

Trades

Welders, fabricators, riggers

Labour and supervisors

Yard and site crews

HOW TO REQUEST A CREW

01

Tell us the roles

The roles, the site and the duration.

02

Written supply plan

Names, papers, rates and the start date, agreed on paper.

03

Site-ready on arrival

IDs, licences and references checked before anyone travels.

AGREED IN WRITING BEFORE A PLACEMENT

Checks before travel

Identity, licence and reference checks for every person, with the files handed to your compliance team.

Agreed pay dates

Role, headcount, site, duration, rates and pay dates agreed on paper first.

Safety on site

PPE issued and logged, a safety briefing before work and supervisor check-ins in the first week.

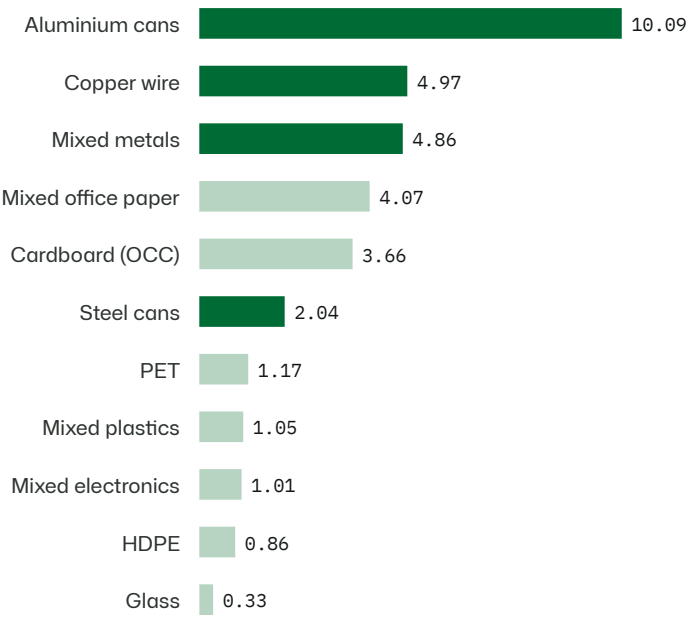

Crews are briefed in English, Arabic, Urdu, Bengali, Hindi, Tagalog or Malayalam.

REPORTING AND CARBON

Reports, with the method shown

Tonnage by stream, diversion share and destinations, with every figure traced to a weigh ticket. Avoided emissions are calculated per stream and grade and kept separate from the client's own inventory, in line with the GHG Protocol.

Tonnes of CO_2e avoided per tonne recycled instead of landfilled

Source: US EPA WARM v16 (December 2023), landfill minus recycling factor, converted to metric tonnes; canasa emission factor register. Metals in green.

DIVERSION RATE

(recycled + composted + reused) ÷ total × 100

Energy recovery reported separately

AVOIDED EMISSIONS

tonnes × (EF landfill − EF recycled)

Summed per stream and grade, never on a total

CERTIFICATES ISSUED TO CLIENTS

Certificate of Recycling
Tonnes recycled, by stream and named outlet

Certificate of Diversion from Landfill
Share of collected weight kept out of landfill

Statement of Avoided Emissions
tCO_2e avoided, kept apart from your inventory

Certificate of Data Destruction
Planned, 2026: device serials and the NIST SP 800-88 method

SAUDI TARGETS FOR WASTE AND EMISSIONS

90%
of the Kingdom's waste to be diverted from landfill by 2040, the national target overseen by MWAN.

18%
diverted from landfill in 2024, by MWAN's own figures.

2060
the Kingdom's net zero target, pursued through the Circular Carbon Economy: reduce, reuse, recycle, remove.

Sources: Arab News citing MWAN (15 December 2025); Saudipedia; Saudi Green Initiative; G20 Circular Carbon Economy platform (2020).

METHODS WE CITE

GHG Protocol, Scope 3 Category 5 · US EPA WARM v16 (December 2023) · UK DESNZ conversion factors 2025 · NIST SP 800-88 Rev. 2 for data destruction

SAFETY AND COMPLIANCE

Six policies that apply to every job

Safety

Risk assessed before a job starts. Where Saudi law and site rules differ, the stricter applies.

Quality

Methods are written down, so any report can be rebuilt from its tickets.

Environment and recycling

Dust, noise and run-off controlled; hazardous items stored apart; licensed outlets only.

Conduct and anti-bribery

No bribes, facilitation payments or gifts that could sway a decision.

Data and confidentiality

Data-bearing devices logged by serial number and kept locked until destroyed.

Stop-work authority

Anyone may stop a job they believe is unsafe, without penalty.

SAUDI REQUIREMENTS WE WORK TO

MWAN
Waste Management Law

NCEC
Environment Law

HRSD
Labour Law and occupational safety

GOSI
Social insurance

CHI
Health insurance

TGA
Transport regulations

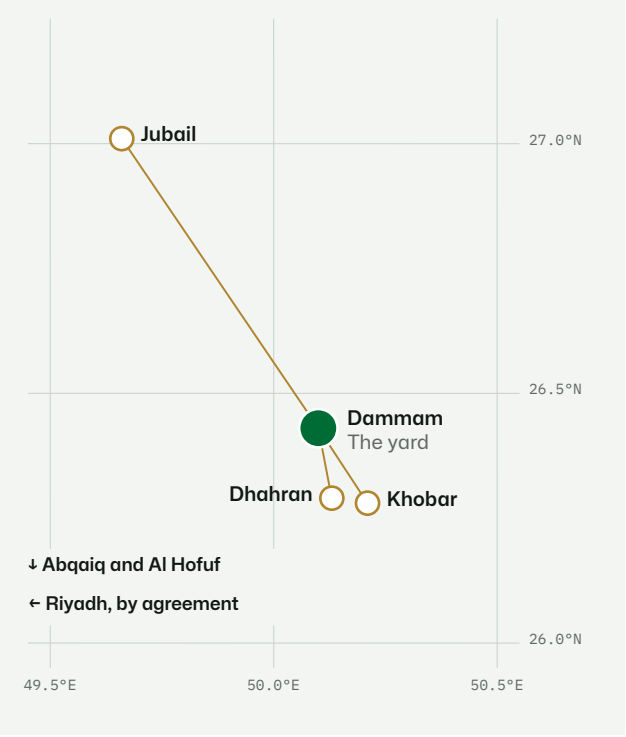

Civil Defense
Fire safety and emergency plans

SDAIA
Personal Data Protection Law

Policies follow the structure of ISO 9001, ISO 14001 and ISO 45001. This is not a claim of certification.

COVERAGE AND ROADMAP

Where we work, and what is being built

THE YARD

2nd Industrial City, Dammam 34332

BINS AND ROLL-OFFS

Dammam, Khobar, Dhahran, Jubail, Abqaiq and Al Hofuf

FURTHER AFIELD

Riyadh by agreement

PLANNED, 2027

Riyadh operations: a second yard

ROADMAP

OPERATING

Licensed recycling yard, Dammam

2nd Industrial City, Dammam 34332

Certified weighbridge

Quote, ticket and receipt for every load

Pickup service, Eastern Province

Dammam, Khobar, Dhahran, Jubail, Abqaiq and Al Hofuf

IN BUILD AND PLANNED, 2026

Wire processing line

Insulated cable processed in-house for better recovery on every gauge.

Certified e-waste destruction

Documented destruction for drives and electronics, for regulated clients.

2027 AND IN DISCUSSION

Riyadh operations

Planned 2027: a second yard and pickup coverage for the central region.

Mill supply partnerships

In discussion: direct, recurring supply into Saudi mills.

THREE WAYS TO CHECK US BEFORE THE FIRST LOAD

Look up the CR

Enter our Commercial Registration number, 7054504357, on the Ministry of Commerce portal.

mc.gov.sa

Call the yard

The line is answered during gate hours, in Arabic or English.

+966 56 978 9151

Watch a weigh-in

Turn up at the gate unannounced and stand beside the scale while a load goes over it.

Sun–Fri 06:00–19:00

canasa | كاناسا

Start with a single load

Send photos on WhatsApp for a written price, or drive in during gate hours. One bin from a workshop gets the same scale and the same paperwork as an industrial contract.
